Artwork Requirements:

We accept the following file formats:
.ai, .eps, .pdf, .psd, .jpg, .tif

However, wherever possible please supply us with Illustrator files for the vector graphics and layouts and Photoshop files for raster images.

Artwork created in Freehand and Quark Express are also accepted but not encouraged, while Corel Draw files will NOT be accepted.

Please ensure all fonts are converted to curves, and all linked graphics are either embedded in the layout or supplied along with the layout file.

In the case of live artwork, make sure the requisite fonts files are also included.

Images should be provided at 300dpi, in RGB wherever possible, given that it provides a wider gamut of colours which translates into better colour representation and accuracy. However, CMYK files are also accepted.

Colour proofs should also be provided to give us a general idea of the colours that you would like to achieve along with your layout. *Please note, because of the widely varied differences between colour profiles, printed media, monitors and printers being used to build and proof artwork, identical matches of all colours may not always achieve 100% accuracy.*

Artwork can be supplied on the following Media:
CDs, DVDs, Flash Drives.

Artwork can also be emailed to the following address (as long as the file size doesn't exceed 10 megabytes) bgibbs@caribsurf.com
